Wandsworth, London, UK, 2011

## *Materials Recycling Facility*

### **Installation Of Materials Recycling Facility**

Canadian specialist MRF manufacturer Machinex Industries Inc. contracted Ebbfleet Engineering Services to offload and install steelwork and processing machinery delivered to the Smugglers Way site in 140 off 40' shipping containers.

Works commenced in late 2009, and the plant was officially opened in May 2011 by HRH Princess Anne.

This was a very challenging build for Ebbfleet Engineering Services due to the very limited amount of space available on the site and the consequent vertical build of the plant.

The MRF was build to process 84,000 tonnes of recyclables per annum for the Western Riverside Waste Authority.

Upon completion of the civil engineering works the principal contractors role was awarded to EES Ltd for the remainder of the project.

**Overall Project Value :**  
**£25,000,000**

**EES Ltd Contract Value:**  
**£1,100,000**
