

# OKLM Recycling Technology Ltd

## Sleekburn, Co. Durham

### *Materials Recycling Facility*

## **Installation Of Full Materials Recycling Facility**

EES Ltd supplied supervision, skilled machinery handling tradesmen, and all lifting plant and access equipment required to undertake the following works in accordance with OKLM installation programme and engineering specification.

Offloaded materials recycling equipment from delivery vehicles at Sita, Sleekburn, County Durham. Full survey of the floor was undertaken, marked out with optical alignment equipment to OKLM floor plan and elevations, installed and erected full materials recycling equipment in accordance with OKLM installation programme of 89 working days.

Trommel (46 Tonne).  
Drive systems and drum sections installed.  
All other plant under confidentiality agreement.

Our method of installation negated factory roof removal, saving time, and costly mobile craneage / inclement weather risk.

EES Ltd undertook additional/remedial works during the installation period, in accordance with documented and priced site variation orders, authorised by OKLM site representative, and assisted with commissioning on day work rates, post completion.

Upon completion of the civil engineering works the principal contractors role was awarded to EES Ltd for the remainder of the project

**Overall Project**  
**Value: £22,000,000**

**EES Ltd Contract**  
**Value: £625,000**
