Worldwide Manufacturers of Subsea Cables

Project Management For Decommissioning Of Vertical Laying-Up Machine

Ebbfleet Engineering Services Ltd was selected by a major international engineering company to undertake the subcontract for Pirelli. Ebbfleet Engineering Services Ltd provided project management for the decommissioning, marking-up and dismantling of the Vertical Laying-up Machine and provided all documentation for the re-assembly in Naples, Italy.

Utilising Ebbfleet Engineering Services Ltd experience and expertise within the cable industry, the project management encompassed:

- Management of all CDM(Construction, Design & Management) regulations
- Marking-up of support structural steels
- Identification and removal of all electrical cables
- Total dismantling of the Vertical Laying-up Machine
- Removal of Vertical Laying-up Machine from site
- Loading of Vertical Laying-up Machine for transportation to Naples

Ebbfleet Engineering Services Ltd provided all initial project planning to on site project management. Total tonnage dismantled and shipped: 750 Tonnes

Ebbfleet Engineering Services Ltd worked in conjunction with DPB (Italian heavy lifting company) to mark-up and dismantle 4 x 1000 tonnes Kvaerner turntables and Pirelli. The contract involved a total alignment survey, dismantling and loading to transport.
