

Environmental Policy Statement of Ebbfleet Engineering Services Ltd

Ebbfleet Engineering Services Limited recognises that all activities can impact on the environment both locally and globally and acknowledges the need for responsible action in this area. We operate as contractors and consultants and we aim to minimise the environmental impacts of our business activities and influence those of organisations we work with to bring about positive change

Our key aims are to:

Comply with and, where practical, exceed all applicable environmental legislation and other specific requirements to which the company subscribes:

- Support our clients in their environmental and corporate responsibility activities.
- Prevent pollution of land, air and water from the company's premises and its activities.
- Implement measures to reduce our carbon footprint.
- Procure goods from sustainable sources wherever possible.
- Demonstrating our responsibility as a good neighbour by actively supporting environmental initiatives in the local communities where we operate.

To achieve this we will:

- Maintain our environmental management.
- Encourage development of environmental strategies on projects we are involved in.
- Provide and improve awareness of issues to our staff.
- Involve employees in environmental programmes.
- Promote a culture of environmental awareness across the organisation.
- Identify, address and manage key risks.
- Minimise energy consumption.
- Use renewable energy sources wherever possible.
- Promote waste minimisation, re-use and recycling of waste.

- Monitor waste transfer arrangements to ensure safe disposal.
- Strive for continuous improvement in environmental performance.
- Review the policy annually.

Accountability for meeting the commitments in these policies rests with the Directors and Management team but implementation requires the support and commitment of all the company's staff.
